

Eastern Slopes Veterinary Services offers full service care to both small and large animals in our brand new facility (the big **Red Barn**) located just minutes from our previous clinic, in Black Diamond, Alberta.

On the small animal side of our new clinic, we have a fully functional laboratory, radiology, ultrasound, two surgical suites and a dental suite. We also have specialty surgeons coming into our clinic to perform surgeries - enabling clients to have specialty procedures done within a familiar setting. Our goal is to provide big city expertise with small town practicality and common sense.

We recognize that visiting the vet can be a stressful event, and we encourage the owner to be present and involved as much as possible, for it brings comfort to a pet in otherwise unfamiliar surroundings. A huge benefit to our new facility is our exam rooms have a separate outdoor entrance in case an animal is uncomfortable around other animals, or if privacy is needed.

Our large animal side of the clinic is a fully functional large animal facility, including a bovine hydraulic chute and tilt table, horse stocks, horse stalls for overnight treatment and observation, and more. Our skilled large animal team can provide hoof care, dental care, surgical services, and treatments in a controlled clinical environment, as well as on-farm calls.

We pride ourselves on our continuity of care for our clients and patients. We strive to earn the trust of our clients by providing the best care we can while being sensitive to each individual situation.

Thank you to all of our clients that have been with us since day one, as well as those families that are new to us. We are proud to be "Your Other Family Doctor"! We appreciate your ongoing support over the past 20 years!
